

COMPLETED PROJECTS

VENTS is a leading manufacturer of a comprehensive range of ventilation equipment exported to more than 90 countries worldwide. The products are sold via an extensive network of distributors in 120 countries allowing for more than a 10 % share of the world's ventilation market. The company's products are made in Boyarka, Ukraine.

The manufacturing facility which consists of 16 shop floors spanning across more than 60,000 m² of territory produces over 10,000 ventilation equipment items. The VENTS production process is certified according to ISO 9001:2000 international standard for quality management systems of organizations and enterprises.

A streamlined quality control system helps ensure compliance of VENTS products with most stringent EU quality control and safety standards which is further acknowledged by numerous certificates issued by leading international certification institutes and organizations.

Profound experience coupled with our in-house design bureau and modern production facilities help us to keep the hand on the HVAC industry pulse, quickly respond to the ventilation market trends and satisfy the equipment demand for most complex projects.

We pride ourselves in maintaining an extensive distributor network to ensure customer outreach in every part of Ukraine.

The company has a dedicated Climatic Engineering and Design Solutions department whose experts take part in developing bespoke ventilation and air conditioning system projects for all kinds of construction projects.

This catalogue presents some of the completed Ukrainian and foreign projects whose climatic systems are based on the ventilation equipment by VENTS.
